

Series 330

3/8 Inch

AC Gaging LVDTs

The Series 330 3/8" AC Gaging LVDTs provide precise linear displacement sensing in a compact, spring loaded package. Advanced coil winding techniques are employed to minimize package length and optimize overall performance. Spring forces have been carefully selected to insure the proper balance of mechanical frequency response and tip force. Available in strokes ranging from ±0.005" to ±1.0", these sensors are ideally suited to material thickness measurements, single or multi-point surface profiling, creep testing, or any other application requiring the use of a small, spring loaded LVDT. These transducers are also an excellent replacement for a standard dial indicator.

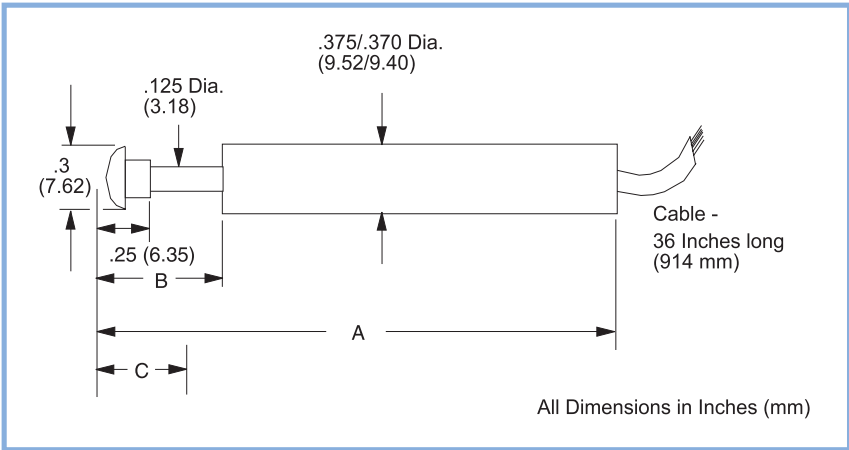

KEY FEATURES

- Ranges from ±0.005” to ±1.0”
- Non-linearity ≤ 0.20%
- 20 Microlnch Repeatability
- Self-Lubricating Bearing

SPECIFICATIONS - ELECTRICAL *(Reference frequency 7.0 KHz)*

ACCESSORIES

PART NUMBER	DESCRIPTION
A002-0041	Adapter for alternate contact tips: 5-60 Thread to 4-48 UNF-2B Thread
G000-0000	Contact Tip, AGD #7
G000-0008	Contact Tip, .30" Spherical O.D.; 5-60 Internal Threads. (Included with transducer)

DC-DC OPERATION WITH OPTIONAL OSCILLATOR/DEMODULATOR

To facilitate prototyping, or in instances where the preference is a DC in - DC out system, any of the standard or High Temperature Series 330 can be used in conjunction with the Model 1000-0014 Oscillator/Demodulator. Designed to work together, the DC system gives the same level of performance as provided by the AC LVDT alone. The high level DC output voltage can be directly interfaced with analog circuits as well as data acquisition

cards, PLCs, or A/D converters. Provisions for customizing the Model 1000-0014 to provide zero offsets and nonstandard gains allow a simple and cost effective method of tailoring a system to meet individual customer requirements. Detailed connection information can be found in the Accessories portion of this catalog.

SYSTEM SPECIFICATIONS *(Combined Performance of LVDT and 1000-0014)*

HIGH TEMPERATURE VERSION: -65°F to +400°F (-55°C to +204°C)

The High Temperature version of the Series 330 is identical to the standard version except for the following:

- Operating Temperature is -67°F to +400°F (-55°C to +204°C);
- Units terminate in six #30 AWG Teflon insulated leads (3 ft. long);
- Some materials such as the epoxy, solder, and magnet wire have been replaced by their high temperature equivalents;
- Electrical characteristics of certain units have been changed as described in the accompanying table.

MODEL #	STROKE ±Inches (mm)	PHASE ANGLE Degrees	INPUT IMPEDANCE Ohms	INPUT RESISTANCE Ohms	OUTPUT RESISTANCE Ohms
